

VISION

"To become a leading study program in providing education and teaching, research and community service in the field of Biology, especially Environmental Biology, which is professional and has an Islamic personality."

MISSION

1. Providing a moral foundation for biological development and providing enlightenment in the development of faith and piety.
2. Carrying out integrative education and teaching in the field of biology that concentrates on theoretical and practical environments.
3. Carrying out research and development in the field of biology, especially the environment.
4. Organizing community service activities related to biological applications to improve the quality of life of the community.
5. Organizing modern management of study programs that is oriented towards quality, transparency, accountability and professionalism.
6. Establish mutually beneficial cooperation with government and non-government institutions, both domestic and foreign, oriented towards strengthening PS.
7. Building collaboration with various associations in the field of biology.

STRATEGIC GOALS AND OBJECTIVES

- Increase research efforts in the emerging field of biological sciences and develop nationally recognized learning centres for undergraduate and graduate curricula.
- Increase recruitment and support for innovative and exceptional faculty who through research and teaching will develop the scientists, health professionals, government professionals, and mentors of tomorrow.
- Foster an engaging environment where teaching, research, and service will stimulate our students to become leaders for the people of this state, nation, and world.
- Enrich our regional environment with the development of scientific programs that include opportunities for local community participation.

PLO	PLO REDACTIONAL	CATEGORY	TOTAL COURSE	PLO ACHIEVEMENT
1.1	Able to solve science and technology problems in the field of management and utilization of biological and environmental resources through principles of biology and relevant sciences.	Specialized Skills	19	85%
1.2	Capable of applying biological knowledge for personal, societal, and environmental benefits in everyday life.		41	35%

1.3	Able to present alternative solutions to problems in the field of management and utilization of biological and environmental resources within a specific scope, which can be used as a basis for making informed decisions.		2	72%
2.1	Mastering the principles and theoretical concepts of biology supported by relevant sciences.	Mastery of Knowledge	15	81%
2.2	Mastering the concepts, principles, and applications of biological knowledge in the utilization of biological and environmental resources, as well as related fields.		39	83%
2.3	Mastering relevant concepts, principles, and applications of biotechnology.		30	80%
2.4	Mastering the principles and concepts of technology-based measurement, instruments, as well as standard methods in analyzing and synthesizing biological and environmental resources.		0	0%
3.1	Applying logical, critical, systematic, and innovative thinking in the context of developing or implementing science and technology according to their expertise area without disregarding ethics.		25	85%
3.2	Managing learning independently, with quality, and measurably.	General Skills	33	90%
3.3	Developing and maintaining a network of collaboration with mentors, colleagues, and peers both within and outside of their institution.		18	82%
3.4	Taking responsibility for achieving work results either independently or in groups, as well as being capable of		15	87%

	supervising and evaluating the completion of such tasks.			
4.1	Upholding human values in carrying out tasks based on religious, moral, and ethical values and norms.	Attitudes	7	97%
4.2	Appreciating cultural diversity, perspectives, religions, beliefs, as well as the opinions or original findings of others.		7	93%
4.3	Complying with the law and maintaining discipline in societal and national life.		5	97%
4.4	Internalizing the spirit of independence, perseverance, and entrepreneurship.		6	97%
